**Subject: Kingdom Community Wind Farm - Lowell, VT**

Dear Mr. Pughe:

This letter is in response to your letter dated April 9, 2010, requesting our acknowledgement of the proposed wind farm and its potential effects on the State's highway infrastructure.

As stated in your letter, the wind development project will require access to Vermont Route 100, at approximately mile marker 2.3 right. The proposed access location appears to have sufficient sight distance in both directions. Based on the anticipated three to four permanent employees; the project will not cause any unreasonable burden on the transportation system.

Any work within the State highway right-of-way will require an Agency permit. Design and construction of the access will be in accordance with the Vermont Agency of Transportation's Standards. It is recommended that you submit your permit request as soon as practical.

If we can be of further assistance, please do not hesitate to call me at (802) 828-2485, or Jim Clancy, at (802) 828-2486. We look forward to working with you in processing your application.

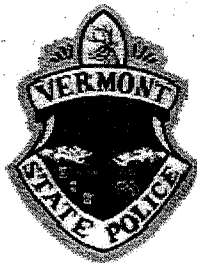

Sincerely,

A handwritten signature in black ink that reads "Craig S. Keller". The signature is written in a cursive, slightly slanted style.

Kingdom VT

Dear Mr. Pughe,

I have reviewed the material you provided regarding the project referenced above. The Vermont State Police department in Derby, VT is the primary state police service for this location. As proposed, this project will not place an unreasonable burden upon the services of this department to provide police services either to the town of Lowell, or the surrounding communities for which the Vermont State Police covers.

If I can be of any further assistance, please do not hesitate to contact me.

Sincerely,

*Walt W. Goodell*

Re: Proposed Kingdom Community Wind Farm – Lowell Mountain Range

Dear Mr. Pughe,

We have received the material you provided regarding the project referenced above. The Lowell Fire Department is the primary fire and rescue agency for this location. As proposed, and with necessary equipment which GMP has agreed to purchase in the contract with the town, this project will not place an unreasonable burden upon the services of our fire department to provide emergency fire and rescue services either to the project itself, or the surrounding communities for which the Lowell Fire Department covers.

If I can be of further assistance, please don't hesitate to contact me.

Sincerely,

**Re:** Proposed Kingdom Community Wind Farm — Lowell Mountain Range/Northeast Kingdom VT

Dear Mr. Pughe,

I have received the materials about the proposed wind farm in Lowell, VT. Missisquoi Valley Ambulance Service (MVAS) is the primary emergency medical response service for this area. After careful review of the materials provided to me, by you, in regards to the project referenced above, I am confident that this proposed project will not place an unreasonable burden on MVAS.

However, I do have some concerns and requests. MVAS will need to be kept up to date regarding the construction schedule. We need to know when there will be construction activity, what types of activity, i.e. logging, excavation, or erection, and an approximate number of workers on site. We would also like to have periodic access to the site to assess the level of hazards to the construction workers and to our crews if they were to be dispatched to the site.

Our other concern is in regards to the possibility of an accident or medical emergency at the turbine hub elevation. MVAS needs to be aware of any existing protocols or be part of the process of writing an emergency response protocol. MVAS will need to be reimbursed for, or supplied with, any specialized equipment and/or training needed for such an incident.

Please feel free to contact me with any questions or concerns.

Sincerely,

  
Scott Rappold, President  
Missisquoi Valley Ambulance Service
